Student Satisfaction Survey Report

(2022-2023)

Student satisfaction surveys are an important tool for measuring the effectiveness of education and identifying areas for improvement. By gathering feedback from students about their experiences in the classroom, the College can gain valuable insights into what is working well and what needs to be changed. The Institution regularly takes feedback from the students regarding teaching -learning experience and College Infrastructure. This feedback helps the College to work on the shortcomings in its work as well as to make informed decisions about curriculum development, teaching methods, and resource allocation.

Conducting a student satisfaction survey can also improve communication and build trust between students and teachers. By giving students a voice and actively seeking their input, educators can demonstrate that they are committed to creating a positive learning environment. This can increase student engagement and motivation, leading to improved academic performance and greater student success.

The College resumed the offline classes in the month of November 2021. The opening of classes after the prolonged period of Covid-19 induced lockdown led to the blended mode of teaching-learning. Both the online and offline classes started simultaneously. This feedback survey is focused on both the online and offline mode of teaching-learning.
